

Protocol for Adult Brucellosis Vaccination of Cattle

1. Vaccine Used: RB51
2. Vaccine Dose: Full CalfhooD Dose (2 cc)
3. Tattoo in Right Ear: R (RB51), A (Adult), V (Vaccinate) and the last number of the year. Example: RAV0
4. Tag in Right Ear: Bright Silver Identification Tag. Example: 87AFA7225
5. Record: Brucellosis Vaccination Record (VS-424) completed and returned to the Utah Department of Agriculture and Food within two weeks of vaccination.
6. CAUTION:
 - a. It is best if adult vaccination is done during the time when cattle are NOT pregnant. In rare cases, pregnant cattle may abort after being adult vaccinated.
 - b. Be aware that some states and nations will NOT permit adult vaccinated cattle to be imported.
 - c. Neither state nor federal employees nor their representatives shall be held liable for any losses which occur from the administration of RB51 vaccine.
7. If you have any questions about the protocol please call: (801) 538-7162 or (801) 520-4309
